

WORK EXPERIENCE

- **Mantiqh** Bangalore, India
Sr. Frontend Developer / Mobile Developer Feb 2025 – Present
 - Architected **React**, **React Native**, and **TypeScript** frontend solutions using **atomic component design** principles, improving delivery speed and reducing API integration issues by **30%**.
 - Implemented **SSR**, **bundle optimisation**, and **lazy-loading** to cut dashboard initial load time from **3.5s** → **2.1s** (43% improvement), tracking **Core Web Vitals** (LCP, CLS) regressions via **Sentry** and real-user monitoring.
 - Developed custom **Canvas API**-driven animated chart components enabling fluid **micro-interactions** with zero **performance budget** degradation; enforced **performance budgets** for bundle size and TTI across sprints.
 - Integrated **AI-assisted development** workflows (prompt engineering with LLM tools) to accelerate code-review and scaffolding, reducing boilerplate authoring time by **~20%**.
- **NDTCCS** Dammam, KSA
Software Engineer (Full-time, Onsite) Jun 2023 – Feb 2025
 - Led frontend development of **Bexel**, an in-house equipment management platform built with **React + TypeScript**, integrating real-time operational data—license status, calibration records, and site-location tracking via **interactive maps**—enhancing data visibility by **~40%**.
 - Automated **form-to-PDF workflows** within Bexel by building dynamic document templates and integrating backend services, reducing manual report-generation time by **60%** and cutting data errors by **30%**.
 - Authored and executed **end-to-end test** scenarios with **Playwright**, achieving **85%+** UI flow coverage; validated **WCAG 2.1 AA** compliance using **Lighthouse** and **axe**, collaborating with cross-functional teams to reduce data inconsistencies by **25%**.
 - Standardised internal development workflows using **GitHub Actions (CI/CD)** and **Docker** to containerise and deploy Bexel, reducing environment-related deployment failures by **30%** and improving release consistency across environments.
- **NDTCCS** Remote
Junior Frontend Developer (Contract, Remote) Sep 2022 – Feb 2023
 - Developed and maintained the **main NDTCCS company website** using **HTML5**, **CSS3** (Grid, Flexbox), and **JavaScript (ES6+)**, implementing **responsive design** and **semantic markup** for improved accessibility and SEO.
 - Built an **in-house document creation tool** enabling structured generation of internal reports and forms; collaborated with senior developers to translate requirements into functional UI components, establishing foundational **React** and **TypeScript** skills.

SKILLS

- **Frontend:** TypeScript, JavaScript (ES6+), React.js, Next.js, Astro.js, HTML5, CSS3, Tailwind CSS, Shadcn UI, Material UI, Zustand, Redux Toolkit, TanStack Query, Zod, **Storybook**, Three.js, WebGL, Canvas API
- **Testing & Quality:** **Playwright** (E2E), **React Testing Library** (unit), **Lighthouse** / **axe** (accessibility & WCAG 2.1 AA), **Storybook** (visual regression), **Sentry** (RUM / error monitoring)
- **Performance:** Core Web Vitals (LCP, FID, CLS), lazy-loading, code splitting, bundle optimisation, **performance budgeting**, CDN / edge caching (AWS CloudFront)
- **AI / GenAI:** AI-assisted development, prompt engineering, LLM tool integration, responsible AI practices
- **Infrastructure & Tools:** AWS (S3, CloudFront), GitHub Actions (CI/CD), Docker, Git/GitHub, Google Analytics, Postman, Figma, Jira, Notion, VS Code, Neovim
- **Backend & APIs:** Node.js, Express.js, REST API design, OpenAPI/codegen, SSR (Next.js), MongoDB, Firebase, Supabase

- **Security:** XSS prevention, CSP headers, CORS, secure cookie handling, OWASP frontend best practices
- **OS:** Linux (CLI and GUI), Mac, Windows
- **Languages:** English (Business Proficiency) | Japanese (targeting **JLPT N3**, exam: July 2026)

EDUCATION

- **KLS Gogte Institute of Technology** Belgaum, India
Masters in Computer Applications, Computer Science (CGPA: 6.5) Graduation: Jul 2022

PROJECT EXPERIENCE

- **Ecocrew**  *Marketplace for recyclable goods*
 - Built **mobile + web frontend** for a marketplace where users earn eco-coins for selling recyclables; implemented **GSAP animations** and a fully **responsive UI** with **WCAG 2.1 AA**-compliant components.
- **Keys On Rent**  *Rental management platform*
 - Developed **web + mobile frontend** with **interactive map integrations**, improving search efficiency by **~35%**; built dashboard modules and notification/email workflows reducing overdue rent incidents by **~30%**.
- **SellYourLegacy**  *Business listing platform*
 - Implemented **SSR** (Next.js), improving load speed by **~50%**; applied **structured data** and **canonical URLs** boosting **SEO** rankings; built admin dashboard reducing admin overhead by **~40%**.
- **Guided Reserve**  *Precious metals trading platform*
 - Developed **secure login flows** (XSS prevention, secure cookies) and **real-time tracking** dashboards, reducing unauthorised access by **~30%** and settlement time by **~40%**.
- **Bexel (NDTCCS)**  *Equipment data & report generation app*
 - Integrated equipment status, calibration records, and mapping (**~45%** visibility gain); automated **form-to-PDF pipelines**, cutting delivery time by **~60%** with **30%** fewer data errors; validated **Lighthouse** accessibility scores.

OPEN SOURCE

- **The API Playground** *API testing and exploration tool*
 - Built a **BFF-style** API testing tool supporting real-time requests across multiple **HTTP methods**, custom headers, auth, and structured response inspection (status codes, headers, body).
- **RoboticsAcademy** *Robotics & AI learning platform*
 - Contributed to **documentation** and **ROS-based exercise modules**, improving accessibility and easing deployment via **Docker** images.
